HTab, alternative multimedia solution focused on patient

HTab offers entertainment and communications tools for patient well-being “all-in-one” complete and economical solution.

Turn-key global solution HTab brings together a computer, TV, telephone, radio and interactive functions into a single, easy-to-use, touch-screen terminal that enable patients with a quantum leap of amusement, communication, self-service and education options. Through HTab, healthcare process become patient own engagement. Indeed, the patient is directly linked to the different hospital services and can access to Intranet therapeutic education programs.

By combining ARBOR best-in-class 10 inch rugged tablet computer and TMM versatile Multimed Suite software on several stands, HTab is perfectly adapted to the requirements of any healthcare establishments. Dedicated to patient well-being and comfort, the solution also offers a secure access to patient records in order to increase clinician efficiency and workflow. A global solution for a very competitive price !
